## Lump Sum For Relief to the Provinces

This is Proposition Made at the Conference by Premier

Prime Minister Bennett has announced that in future the federal government will give monthly allowances to the different provinces or unemployed relief instead of a percentage of the cost for this purpose as in the past.

While all the provinces are not agreed on the fairness of the proposition, yet when looked at from all angles it does appear to be most reasonable.

Under the old system, when provinces and municipalities were paying only a small portion of the relief handed out, there was bound to be a tendency to be more liberal than necessary with their relief since their share of it was so small. There was also the tendency to do it in a haphazard way, without first giving each case careful investigation and of keeping proper accounts of expenditures for this purpose. It also opened up the way for the padding of lists and unnecessary costs in the administration of these funds.

Under the new proposed system, when provinces and municipalities are allotted lump sums, those responsible for the distribution of their respective allowances will watch that lump sum closely. They will go over their expenditures monthly just as they now go over their estimates to see if they are keeping within the limits as set out at the beginning of their fiscal year.

These lump sums will be arrived at by going over expenditures for this purpose for several years past. This should give a fairly accurate idea of the amounts required.

Of course there is the possibility of economies, such as sickness, epidemics, etc., but these will, no doubt, be properly taken care of when the emergency arises.

On the whole it looks as though those in authority are making a strenuous effort to get this relief proposition down to a real business basis when the most good can be done to those most in need and to save as much overhead as possible.

## CANADA'S BEST CUSTOMER IS THE BRITISH ISLES

The British Isles is now Canada's best customer, a distinction held for several years by the United States. In 1932, domestic exports to the British Isles totalled \$178,171,680 in value or \$15,540,901 more than to the United States; in 1931, similar exports to the United States amounted to \$256,942,045 or \$86,407,223 more than to Britain. Canadian exports to Britain in 1931 were valued at \$171,534,822 so that the 1932 value shows an increase of \$6,636,858. From June 1 to December 31, 1932, exports from Canada to the British market had a value of \$115,487,568, an increase of \$19,952,759 over the corresponding six months of 1931.

## Softball Girls Play Box Springs Team

Have Pleasant Social Time After: The Game

Redcliff softball girls went out to Box Springs last Friday evening and had a game with a mixed boys and girls' team of that district. The girls put up a splendid game and were successful in winning out by 2 runs to 7.

After the game the home team entertained the visitors by a social evening in the hall where dancing was indulged in and refreshments served. The evening was thoroughly enjoyed by the only complaint being that the girls had to leave early on account of this threatening weather.

## "Half A Sinner" At Monarch Theatre

"Half A Sinner," gay and tense comedy drama of a Kansas cow town has been booked into the Monarch theatre showing Thursday, Friday and Saturday this week. With the noted stage star, Bertie Churchill, who plays the title role, are Joel McCrea and Tallie Blane, the crowd's newest and most delightful romantic team in this Universal picture.

The story is that of a cowboy who arrives in a small town determined to outplay all the local poker enthusiasts. He becomes involved in the exciting adventure and romance of Joel and Tallie. In one of the most surprising endings of any recent film, he solves their problem and their own.

## WHEAT POOL LEASES VANCOUVER ELEVATOR

Harbor board elevator No. 2, a modern grain terminal with a capacity of 1,625,000 bushels of storage, has been leased to the Alberta Wheat Pool by the Vancouver harbor commission. The elevator, which was taken over August 1st, will give the Pool a storage capacity in Vancouver of 6,775,000 bushels; as its own elevator has a storage capacity of 5,150,000 bushels. This is over one-third of the total grain storage capacity of the port.

Northern Alberta waterfowl declined three lives from drowning last week.

## Redcliff Reminiscences

Taken From the Review File of August 13th, 1915

The big law suit in which Dr. Collier was suing the Stoney, Greenwood & Wheeler Co. for approximately \$500,000 was lost before Justice Simmons last Tuesday.

Nominations for councillors to fill the vacancies caused by the retirement of Messrs McLachlan and Hodge, will be held on Wednesday next.

Wm. Watts, prosperous and reputable merchant of this town, passed away last Wednesday after a long illness.

## Crop Prospects Are Reduced by Drouth

Local Crops Badly Damaged by Drouth and Heat

Crop prospects throughout the province have been greatly reduced by drouth during the past two weeks.

So far as local conditions are concerned, the long drouth and hot winds have done considerable damage. Crops that a few weeks ago were most promising for 30 to 35 bushels to the acre, will not now grow more than 7 or 8. While there is an abundance of straw, requiring time for a 20 bushel crop, the heads have shrunk to such an extent by the heat, that most grain will hardly grade more than chickpeas. Pasture lands have all turned up considerably.

In the province as a whole, however, conditions are sufficiently favorable to assure a fairly substantial yield of grain.

## YOU CAN'T STOP STOPPING A STEAM ENGINE SAID WEIGLEY

Interviewed, and asked to what he attributed his phenomenal success, the late Mr. Wm. Weigley, of chewing gum fame, replied: "To the consistent advancement of a good product."

"But," asked the reporter, "having captured practically the entire market, why continue to expend vast sums annually on advertising?"

Weigley's reply was illuminating: "Once having raised steam in an engine," he stated, "it requires continuous stoking to keep it up. Advertising stokes business and keeps it running on a full head of steam."

This applies to your business too. Don't make a secret of your product. Tell them what it does. Tell them its advantages. Tell them where to get it. Tell them through the press and keep on telling them.

Everybody reads newspaper. Review advertising pays.

## High School Pupils Make Good Showing In The Dept. Exams.

In Junior high school room 100% of pupils passed for third successive year.

In Junior high school room, 94.7% passed.

Average for whole high school was 97.3%.

In Physics 1, Chemistry 1, French 2 and Arithmetic 1, the whole class received honors standing.

In French 3 all pupils passed. 57% of class getting honors.

In Trigonometry 1, all passed 66% getting honors.

In Biology 1, all passed, 71% getting honors.

In Literature 3, all passed, 12% getting honors.

In Composition 3, all passed, 13% getting honors.

In History 3 all passed, 18% getting honors.

In History 2, all passed, 17% getting honors.

In Composition 3 all passed, 33% getting honors.

In composition 4, 83% passed none getting honors.

Individual high marks were: Mildred Walton, 100% arithmetic; Jean Patterson, 96% biology; Ruth Pow 94% arithmetic; Robert Pow 92% physics 1; Sam Fulton 91% French 2; Florence Jacobson, 91% physics 1; Leslie Leppard 91% physics 1; Mildred Walton, 91% physics 1; Beth Pallie 90% arithmetic 1; Mildred Walton, 90% chemistry.

Highest average among the students writing all departmental examinations units were: Robert Pow, 80.9%; Jean Patterson, 80.8%; Mildred Walton, 79.2%; Reggie Rose, 78.3%; Beth Pallie, 74.4%.

Cheques went into the mail at Raymond, Alta. last Tuesday covering the second bonus payment on the 1933 sugar beet crop. The bonus, amounting to 60 cents a ton, will put \$75,000 into the pockets of the growers on the 138,000 ton crop produced last year.

## Wheat Reaches Dollar At Winnipeg Tuesday

Was The Highest Peak Since July 1933

Dollar wheat bounded into the Winnipeg Grain Exchange last Tuesday, hovered for a while then flitted away as prices receded calmly from the top points. Export demand and continuation of drouth conditions drove prices upward. It was May option that touched the dollar mark. This was the highest peak since July 18, 1933.

## BAD DROUTH IN THE MIDDLE U. S. STATES

The drouth of 1934 has inflicted a disaster to United States' agriculture unprecedented in the history of that country. The middle western states are the greatest sufferers, principally North and South Dakota, Iowa, Nebraska, Kansas, Minnesota and Montana. The lack of rain has paralyzed agriculture in these states and the federal government is really alarmed over the situation.

## CANADA DOING WELL AT LONDON MEET

Canadian athletes are making good showing at the games being held at the White City Stadium in London, England, this week.

Harold Webster, of Hamilton, Ont., won the classic marathon setting up a new record of 43 minutes, 36 seconds.

Phyllis Dewar, of Moose Jaw, became the Empire's swimming queen by winning the 440 yards free style final.

George Burleigh, Toronto, won the 100 yards free style swim and George Larson, of Hamilton, Ont., was second.

Sam Richardson, 15 year old Toronto school boy, was the winner of the broad jump of 23 feet 9 1/4 inches.

Robert Dixon, of Vancouver, won the javelin throw for Canada.

A number of boys and girls from all parts of Canada won second and third prizes.

## Churches

### GORDON MEMORIAL UNIT 2 CHURCH

Pastor: Rev. K. Erickson, 10 a. m. Church School, 11:15 Morning Service. Magistrate, Ellis will conduct the service. 3 p. m. Service at Bovell. No evening service. "It is God's presence that makes the world sublime and beautiful."

### ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH, Rev. H. S. Hannett, Vicar. Aug. 12th, 11th Sunday after Trinity. No 8 o'clock celebration. Mattins 11 a. m. Evensong 7:30

## Bad Bush Fire Started Tuesday at Elkwater Lake

Friends of Campers Anxious For Their Safety

Those whose families are holidaying at Elkwater Lake were very anxious last Tuesday evening and night as the news went around that a bad bush fire was raging in the heavily wooded country just south of this popular summer resort.

The fire is said to have started at the old Rutherford sawmill site about four miles from the lake, and spread rapidly in all directions. Great excitement prevailed among the campers and cottagers dwelling all of whom were called out to fight the fire. Farmers and ranchers from the surrounding country were also recruited and as the fire continued making headway, a call was sent out to Medicine Hat and other towns and villages. By noon Wednesday a force of over 400 men were on the scene fighting bravely to get the fire under control.

Although excitement ran high all day Wednesday, as different rumors were set afloat, no time were the campers in any immediate danger.

Latest reports are that the fire is now fairly well under control and unless a high wind comes up from a different direction no serious damage will be done to the resort section around the lake.

Bill Balmer, of Redcliff, and Jack Meyer, of Medicine Hat, who were among the fire fighters, were badly hurt, although neither seriously.

## "Men In White," A Triumph! at Monarch

Will Be Shown Next Monday Tuesday and Wednesday

Every so often Hollywood lends up its toes, takes a deep breath and concentrates its mighty resources on the production of one motion picture. Such apparently was the case with M-G-M's film version of the four-star play hit, "Men In White," for the Monarch theatre, is undoubtedly one of the most effective and distinguished photographs to reach the screen this season.

Clark Gable in a memorable performance, appears as Dr. Ferguson, the young intern who realises all the obligations of his profession but struggles against the conflicting claim of the girl he loves. The girl, played by Myrna Loy, soon comes to the realization that a doctor so encrossed in his career, has no time for love with the result that the young intern is thrown into compelling circumstances with one of the nurses in his hospital. The union, entanglement and its complications bring about a climax which presents a high water mark in dramatic suspense.

Mrs. Broadfoot left on Saturday for Vancouver, where she will spend a week with her son, David, before he returns to the Yukon.

## Just Plain Happy

Honorable George St. Lawrence Neillies Ponzonby, son of His Excellency the Governor-General of Canada and Lady Benson, and Master William Herdridge, son of Honorable W. D. Herdridge and Mrs. Herdridge, and nephew of United Nations, W. D. Bennett, indulging in a fraternal handshake before going on with the business of the meeting—a little heavy and dignified on the glorious Kaiti's Cove Beach of the Algonquin Hotel, St. Andrews-by-the-Sea.

## Character Makes The Man

In a little magazine sent regularly to the writer of this column through the courtesy and thoughtfulness of a friend, and which we always read with pleasure and profit, and from which we frequently quote, there recently appeared a short article that is both timely and worthy of consideration. These rather troubling days when we are inclined to place responsibility for all our life on governments, institutions, systems—in fact, upon anything and everything except our own human frailties. The magazine article referred to reads as follows:

"Most of the ingenious schemes for making this a better world fall down because they assume that man is an angelic creature who would dance singing through the streets, with garlands in his hair, if only the chain of circumstance could be stricken from him. The trouble is that man isn't an angelic creature. He can be about the most onerous member of the animal kingdom. When he's mean, he makes the sabre-toothed tiger look like a domesticated tabby; and for ruthlessness he can bring bluster to the cheeks of a cobra. On the other hand, it's just as big a mistake to assume that man is all mean. He rises just as high as he falls. Nothing in the jungle can match him for courage and self-sacrifice. If he can be a beast, he can also be like those gentlemen who stood on the deck of the doomed 'Titanic,' singing in the face of death. As Byron said, he is 'half devil, half deity.'"

For many years, almost a century in fact, it has been an accepted idea in all democratically governed countries that education was the royal road to sweetness and light. Practically no one questioned it. Laws were enacted making education compulsory, and more and more money was cheerfully poured into the schools for the education of all children, always in the belief that when people are educated, a golden age would dawn. People in all our so-called civilized countries are now fairly well educated, in the accepted meaning of that term, but the golden age has not arrived. Apparently, both education and the church have failed to develop human character and thus eradicate selfishness, meanness and dishonesty, but that where these powerful agencies have failed, parliaments and legislatures can succeed through the enactment of man-made laws and governmental administration of purely man-made social and economic systems. This is a wholly false conception, and if our schools, colleges and churches should ever act upon it they would learn how too late how serious a mistake they had made.

With many sincere people the tendency now is to rely on legislation to accomplish all the reforms which religion and education have failed to bring about in human relationships. Even the churches have been lulled into believing that both education and the church have failed to develop human character and thus eradicate selfishness, meanness and dishonesty, but that where these powerful agencies have failed, parliaments and legislatures can succeed through the enactment of man-made laws and governmental administration of purely man-made social and economic systems. This is a wholly false conception, and if our schools, colleges and churches should ever act upon it they would learn how too late how serious a mistake they had made.

Recognizing the truth of Byron's observation that man is half devil, half deity, the function of the church and of all forms of religion is to cultivate and develop the deity in man and thus seek to overcome the selfishness and meanness inherent in human nature, to inculcate the true principles of life and living, to teach the beauty, the joy, the happiness of true Christian living; in a word, to build up character.

And the function of education as supported as they are by the State is the counterpart of the church. It is not merely to impart knowledge but to train the human intellect and develop man's reasoning powers so as to enable him to think for himself and to exercise his own judgment and discretion and thereby attain to a full realization not only of his own rights and privileges but to a full appreciation of the rights and privileges of his fellow men, and of his obligations to society as a whole; in a word, to live as an intelligent, informed man of character should live.

Parliaments and legislatures have large and important duties to discharge, but under our democratic systems these legislative and administrative bodies will be, and thus seek to overcome the selfishness and meanness inherent in human nature, to inculcate the true principles of life and living, to teach the beauty, the joy, the happiness of true Christian living; in a word, to build up character.

Parliaments and legislatures have large and important duties to discharge, but under our democratic systems these legislative and administrative bodies will be, and thus seek to overcome the selfishness and meanness inherent in human nature, to inculcate the true principles of life and living, to teach the beauty, the joy, the happiness of true Christian living; in a word, to build up character.

## Kindness Was Rewarded

Mechanic Saved Scottish Officer's Life And Received Legacy

A friendship originating in a shell-hole somewhere in France in 1918 has resulted in a woman in London, who has just received a bequest of a legacy of 250,000 francs (about \$50,000), says a Toronto report quoted by Reuters.

The gift is from a Scottish officer whose name is not divulged but whose life Miss Mary Macdonald was hurried into a shell hole by the explosion of a bomb. Miss Macdonald was the wounded officer's sister.

Although the two drifted to different parts of the earth they kept up their friendship—London daily Secret.

Secret and successful test flights of the first aerial steam-turbine-driven aeroplane recently were completed near Berlin in the presence of German army and civilian experts.

Next to London, Calcutta, India, with suburbs is the most populous city in the British Empire.

The celebrated lighting tower of Pisa is made entirely of marble.

Diarrhoea, Dysentery, Colic  
Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the action of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse attending such attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and breaking up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and adult.

On the market for 88 years—you can't see experiment when you use it.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

It didn't—It came—as it  
polines.

## An Era Of Suspicion

Difficulties In The Way Of Achieving Universal Peace

In the world as it is to-day—to be a greater extent even than in the days when Lord Minto and Lord Milner surveyed it—there are overwhelming difficulties in achieving anything like universal peace and freedom. For the moment an era of suspicious nationalism seems to make that idea more remote than ever. But unquestionably the way to attain it lies through the gradual grouping of such nations as are prepared to work and go along together, and to live in peace for all time with one another; and the one group ready formed for this great purpose, bound by all the ties of history, tradition and contemporary requirements, is the existing group of the British nations and dependencies. To disregard this is to disregard a potential force for good would be something worse than folly. To disregard it, as some of our Socialists are fond of doing, is to stultify their own professions. Surely the whole purpose of British statesmen in every capital of the Empire, whether they are Conservatives or Socialists, manufacturers or farmers, should be to consider it, if it strengthens it, and to attract to it the like-minded lovers of peace wherever they are found.—London Times.

## New York Via Arctic

Proposed Arctic Route Would Find Favour With Aviators

The polar regions may soon become as familiar to British aviators as the Irish Sea or the Channel are to British seamen. The air-route to the Far East is nearly halved by proceeding via the North Pole. If direct routes between western stations at Thorshavn (Faroe Islands), Reykjavik (Iceland), Augsmagasin (on the east coast of Greenland) and Godthaab on the west coast of Greenland, and at the southern extremity of Baffinland will come into favour with flyers for several well-founded reasons. If it should prove a reliable proposition to check direction on these sections by wireless, the skilled pilot could contemplate operation along this route in weather which at present would make it hazardous, for it would be largely independent of weather conditions and the visibility. Besides, though the length of this route from England to New York is 4,500 miles, and is much greater than the direct route, a great advantage lies in the fact that it can be divided into 500-mile stages.

## Asleep For Two Years

Chicago Girl Shows Signs Of Awakening From Long Slumber

Daring glances from expressive eyes have roused the hope of physicians that Patricia McGuire, the sleeping beauty of Chicago, may soon arouse from her long slumber.

For more than two years the 26-year-old stenographer has been asleep—victim of a strange disease. Medical men have visited her bedside and attempted to find the secret of the ailment.

Patricia's sister and mother said she frequently opens her eyes now and follows them about the room. She is unable to talk or move. Apparently having suffered no serious physical effects, Patricia gained about ten pounds and several days ago her diet—forced feedings—was administered—was cut down.

## Finding Ready Market

Demand From British Buyers For Canada's Dressed Poultry

Dressed poultry from Canada is finding a ready market in Britain in quantities in the May 15th. From January 1 to May 1st, 935,500 pounds have been exported, an increase of 257,152 pounds compared with the corresponding period of 1933. Meanwhile the demand from British buyers for the same quantity of the shipments have met the market requirements in every way, says an announcement from the department of agriculture.

Nearly 150,000 pounds of tobacco were grown in China last year, breaking all production records for the weed in that country.

## New Law Has Teeth

Canada Tightens Up Regulations In Regard To Firearms

One bit of legislation recently passed by Canada's Parliament has not been as prominently played up in the newspapers as its importance would seem to justify.

For years many Canadian papers have stressed the desirability of making it more difficult to secure and to keep revolvers.

The matter has been under discussion at several sessions of parliament and several changes in the law were effected, but it is only now that the Dominion's legislators have passed a measure that seems to possess teeth that can bite.

Henceforth it will not only be necessary for the purchaser of a firearm small enough to be concealed, to obtain a permit for the possession of such a weapon, but the new law provides that every Canadian now in possession of a revolver must register it with the authorities, and there is a further clause that requires of firearms must also report.

Owners of weapons will be given a limit within which they will be required to register their firearms, and after that time there will be a new law in each case as to unregistered revolver being found.

These new regulations are more drastic than anything yet passed at Ottawa, and it is hoped that they will make it less easy for folks to come into possession of firearms.

## Swimming And Health

An Exercise That Has Come To The Front As A Valuable Form Of Recreation

A well-known swimming instructor states: "The interest in swimming has been stimulated tremendously and it is now possible for people to indulge in this healthful recreation throughout the year."

Swimming would naturally make the health of the nation greater. It may also be the means of saving the swimmer and mother's life, as an exercise swimming has few enemies with which to be compared. "The art of swimming has also developed marvellously," states a writer on "Fitness". In the early days the breast stroke and over-hand stroke were commonly used. The trudgen and single over-hand strokes were next evolved. The writer outlines the methods of swimming and states, "Make up your mind that you will learn or improve". In the crawl stroke is the most popular of all swim strokes. Champions all over the world use it. At this time of year swimming can be made easier by the reading of such an article.

## Aviator Was Lucky

Glided Nine Miles Without Propeller And Landed Safely

To the pilot of a biplane of the aeroplane he was gliding, nine miles without it, finally to come down into the deep waters of a river and escape unhurt was the experience of Dr. Georges Milette, Montreal surgeon, amateur flyer and medical examiner for Dominion Airway Services.

Shortly after leaving St. Hilaire, Quebec, the propeller of Dr. Milette's plane dropped off. The flying doctor glided for nine miles before falling into the Yamaska river near St. Hyacinthe.

The greatest loss in weight in eggs in cold storage through the evaporation of water occurs during the first month or six weeks. Without a sufficient supply of available water, eggs may lose on per cent. or more.

It is believed by the Kulu of Australia that the spirits of the dead ascend to heaven by the rays of the sun.

Some two hundred Homestead aviation pilots in the United States are over fifty years old.

## YOUR LIVER'S MAKING

YOU FEEL OUT OF SORTS

Wake up your Liver

—No Calumet needed

When you feel tired, depressed, run on the edge of nervousness, or when you feel that your liver is not doing its duty, it is a sign that your liver is out of order. It is the most important organ in your body, and it is the one that is most often neglected. It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood. If your liver is not working properly, you will feel out of sorts, and you will be more susceptible to disease. It is time to wake up your liver, and to do so, you need a good liver tonic. There is no calumet needed, and there is no need to worry. You can get a good liver tonic from your doctor, or you can get it from a reliable source. It is time to wake up your liver, and to do so, you need a good liver tonic.

Reaping The Harvest

Far East Has Awakened To Machine Age Era

Europe no longer can exploit the rest of the world as a market, and now, after destroying the civilization of the Orient and India, reaps the harvest, declared Frederick W. Norwood, celebrated preacher of the City Temple, London, England, in a lecture.

Returning from an extended trip, he said the Far East had awakened to the machine-age era.

"In Japan you have a nation that has learned the lessons of western civilization, put them into practice, and now is sending back a surplus of machine-made goods," he said.

"The missionary was not to be blamed. There were, he recalled, 100 commercial travellers propagating industrial ideas to every single missionary. There, too, were great changes in China and India.

"These people are increasingly conscious of what we have taken from them. We have got to think of humanity; stop putting tags on things and letting it go at that," he concluded.

## Canadian Voodooism

Human Credulity Provides One Of The Serious Barriers To Medical Progress

An article in "Health," published by the Canadian Social Hygiene Council, points out the necessity for the general public realizing that many so-called cures are nothing but humbug. At this time of year, when the public is so susceptible to the claims of the quack, it is well to remind them of the fact that the human credulity is one of the most serious barriers to medical progress.

The article states that the human credulity is one of the most serious barriers to medical progress. It is the human credulity that has led to the acceptance of many so-called cures that are nothing but humbug.

## Ancient Reptile

Skeletons Of Reptiles Found In Ontario

Officials of the National Museum at Ottawa say the two meagre specimens unearthed at Morlan, Man. by Dominion geologists, were the first complete skeletons of the 60,110,000-year-old reptiles ever found in Canada. Scattered bones were found in Alberta three or four years ago but no complete specimen.

J. M. Stebbins, Dominion government geologist, who has unearthed many dinosaur skeletons in Western Canada will ship the fossilized bones to Ottawa where they will be mounted for display in the museum. A 25-foot specimen has been on display at Ottawa for some years but it was found in the United States. It may be a year before the completed specimen is ready for the gaze of the public.

## Big Aerial Train Hop

After the recent 950-mile flight of a Soviet "aerial train," authorities announced plans for a similar 3,500-mile flight to Hankow, Central Asia. The train consists of a powerful airplane as "locomotive," and three huge gliders attached to it and each other by cables. The purpose is to test new types of giant gliders and to make a possible air mail passenger route to Central Asia. The flight is sponsored by the Soviet Civil Air Fleet.

A Texas inventor has designed a combination garden tool to serve as a hoe, rake, scud, weeder, grub-hoe, hedge-saw, drill, lawn edge trimmer, cultivator and pulverizer.

Exports of Canadian cattle to Great Britain this year up to June 28 totalled 23,667 as against 22,505 for the corresponding period of last year.

## Use Scalding Steam

Wardens Well Protected If French Convicts Allowed Muttiny

"Scalding" steam is always held ready for use on the two hundred and eighty convicts bound for the French penal settlement on French Guiana, which includes Devil's Island, which recently embarked in the convict ship La Martinique at La Rochelle. During the voyage the convicts are kept in cages under constant surveillance of wardens, who, in the event of attempted mutiny, would be able to turn steam on them.

## A Clever Kid

German ingenuity has solved the problem of looking over the heads of a crowd without getting a stiff neck. At every big street parade in Berlin now, and there is one almost daily, scores of vendors make their way through the crowd selling postcards. With a periscope it is possible to have a front view even if you are standing in the rear ranks.

## Discover Lost Tribe

Known Race of People Found in New Guinea

In a district of New Guinea, hitherto regarded as a mountainous waste, Dr. W. Chinnery, the director of native affairs and district services of the mandated territory of New Guinea, has discovered a people previously unknown to the world, of a primitive type, who have a highly advanced civilization of their own.

This race lives in a wide and fertile valley, is estimated to number 200,000 and has never heard of white men.

They have developed an almost perfect system of garden irrigation, with cross ditches running in a regular chessboard pattern, and build square houses instead of the usual circular huts of the other native inhabitants of the island.

The discovery of this mysterious race, which was made more or less by accident, following the murder of two white prospectors about a year ago, gives rise to wide problems as to the spread of human civilization, for the neighbors of these people are apparently of a considerably lower type.

The "lost tribe" has further peculiarities which distinguish it from all other Melanesian races. They fight not with bows and arrows, but with long wooden pikes, which are said to be almost as long as the warriors' bodies, carried by 15th century English infantrymen. They are also conversant with the necessity of afforestation where timber has been felled in large quantities. Their only tools are made of stone of an exceptionally fine volcanic material.

They are specialists in the production of these axes, and a brick trade is carried on in them with the inhabitants of other villages.

They live in a valley beneath the lofty peak of Mount Hagen, near the Papuan border. The valley flows a formerly unknown river and adjoining the valley is a magnificent area of grass upland, which is likely to prove the best and most important part of New Guinea.

Mr. Chinnery, the discoverer of the "lost tribe," is a scientist of high standing, a past president of the anthropological section of the Australian and New Zealand Association for the Advancement of Science.

He recently discovered people are peaceful and friendly. The men are sturdy and heavily bearded, and the women handsome, beautifully proportioned and graceful. They are greatly from all other tribes in the island.

## Source Of Crystals

Primary Structural Units Of Nature Have Been Discovered

Source of crystals, the primary structural units of nature, has been found in minute electrical forces by scientists at the Pennsylvania State College.

The knowledge revealed offers unlimited practical value, because the structure is the same in nearly everything man manufactures or uses. Silk is crystalline, also the cellulose of all vegetables. Crystals form even upon the regulated life processes for all the hormones and enzymes thus far isolated are pure crystals.

The principle of crystal growth is stated by Dr. Wheeler F. Davy, research professor of physics and chemistry, in a report to the American Society of Steel Treating. He collected the findings of F. Joffe, of Russia, A. Gots and F. Ziegler, of California Institute of Technology, and others with research of his own.

Crystals form when slowest growth together. They may do this in the form of vapor, liquid or even in solids.

As soon as a few atoms get together surface tension spreads over those forming the outer part of the growing structure. This tension is very high in the substance which form crystals. It is due to electrical attraction between atoms.

## Reforming Health Services

The new director of public health, Dr. Ivanoff, is preparing to carry out drastic reforms of Bulgaria's health services. Old and unsuitable hospitals and sanitariums are to be closed or thoroughly overhauled and re-equipped and new ones are to be built. As a preliminary measure, medical fees have been reduced by from 40 to 60 per cent, and corresponding reductions of hospital fees have been ordered.

A seventy-year-old woman of Crewe, England, has made 2,000 garments for the unemployed.

W. N. U. 2098

## HITLER WORRIED OVER MANY PROBLEMS OF GERMANY'S FUTURE

While he is urging the German people to forget the troubles resulting from the uprising in the Nazi Party, and to attain a peace of mind, Chancellor Adolf Hitler, himself, has many things to keep his mind occupied regarding the future of his regime. The layout above depicts his chief current problems—re-organize storm troops; settle the problem of the vice-chancellorship and the future of Franz von Papen; smooth out troubles with the Vatican and the churches; improve the foreign relations, now handled by Foreign Minister Konstantin von Neurath; solve economic difficulties and quell possible new insurrections against his administration.

## Carries Full Equipment

Moquito. Never Has To Go Back For Tools

Unlike the plumber who proverbially forgets his tools and has to go back and fetch them, the moquito never has to do that after working a prospective job. He carries a complete tool kit with him always.

That "he" is wrong thought. It should be "she". The male moquito has whiskery feet and no appetite. The lady, being a perfect lady, has no whiskers; but she is always ready for a leak—out you. In her back she carries a most little outfit consisting of one pair of very fine drills, a second pair rather coarser, a single big drill, a saw, an oilcan and a pump.

And here is how she uses them. The fine drills are so delicate and so sharp that you feel nothing as they go in. Once a tiny pilot-hole has been made the other drills are used to enlarge it and the good work is finished with the saw.

But human skins—even the fairest and delicatest—are tough from the moquito's point-of-view. No use blunting perfectly good tools on such dry and leathery stuff. So the oilcan comes into play. Unfortunately it isn't just oil that she uses as a lubricant. If it were, you wouldn't afterwards have the tickling and the swelling by which you usually discover that you have unwittingly stood her a dinner. She uses an acid solvent which makes the sawing de-lightfully easy. One-two, three-two, and a splendid hole is made.

The solvent does something else. It makes the blood vessel swell, which is just what Madame Moquito wants. Out comes the pump, and next instant she is telling herself that you have got a fever as anything that she has struck for a long time. —Mt. Thomas Times-Journal.

## Largest And Smallest Book

Both Can Be Seen In The British Museum

The world's biggest book is in the British Museum. It is a gazetteer and atlas of the world printed in Amsterdam in 1556, and is six feet high, four feet wide, and six inches thick. It has a wall space to itself, and students have to consult it as it stands in that position. The British Museum also has some of the world's smallest books. Some are slightly smaller in size than a postage stamp. There was a great vogue for these tiny books a century back, and they were carried in the waistcoat pocket.

## To Compete In Australia

The biggest Canadian athletic prize of the year is the trip of 12 Canadian high school boys to Melbourne, Australia, this fall. They will compete there against similar teams from England, South Africa, New Zealand and Australia in track and field events. The selection team, on the basis of which the team will be chosen, will be held Saturday, Aug. 25.

## Net On View

"Most beautiful" said the sweet young thing to the motor car salesman. "And now show me the depreciation, please. I hear it is heavy in these cars."

"As a matter of fact, madam," replied the opportunist, "we found it a car very heavy and it removed altogether!"

## Kindly Lay In Spain

Will Allow No Noise During Time Of Afternoon Siesta

If you feel lazy, during these warm days of summer, and wish that the pace of every-day life were not quite so swift, you may get a little vigorous relaxation out of considering the way things are done in Spain.

In Spain the siesta, or afternoon nap, is an old institution; and just the other day the authorities in Madrid passed an ordinance, effective from the end of summer, prohibiting all music in cafes, restaurants, or other public places between 2 and 4:30 p.m., on the ground that such noise interfered with the siesta of honest Spanish citizens.

This care on the part of government to see that a man gets his afternoon nap undisturbed must sound attractive to many a Canadian. . . . at any rate, on those afternoons when he drags himself back to work from his lunch hour, wondering how on earth he is going to be able to stay awake through the afternoon.

## Cut Ice With Water

Discovery Of New Method Made By Soviet Engineers

A stream of water under high pressure can successfully cut through thick ice, Soviet engineers have discovered. A small working model, in a test, cut three yards of ice more than six inches thick in fifteen seconds, developing a pressure of twenty-five atmospheres. When the ice-breaker Krusak sailed for the Arctic it was equipped with more pumps to experiment further with the method.

## Memory Garden

Have you a place in your garden for sentiment? One well known woman has a Shakespeare plot, a place where nothing except plants mentioned by Shakespeare are allowed. Another woman has a memory garden full of plants from all the places where she has had a good time. Still a third has League of Nations garden with flowers from every country she has visited.

## FANCFUL FABLES

OBVIOUSLY I BETCH A I COULD GET AT LAST FIVE SIX YED EACH O' THEM WAR SPEARS BACK HOME!

## Writers Must Write

Members Of Soviet Union Must Also Have Articles Published

"What constitutes a writer?" is the difficult question which the Russian Union of Proletarian Writers has been called upon to answer. The Soviet government, which takes its writers seriously, suddenly discovered that the writers' union had 1,000 members in Moscow, more than a thousand in Leningrad, and that even the provincial capital of the Ukraine, Kharkov, carried 800 writers on its union lists. "Are these members all writers, and if so, why are they not writing?" the government inquired.

The union, which apparently had not faced this question before looked into the matter. It found that most of its members had little more than their aspiration to recommend them. They hoped to write, and their hope had found expression in one or two short stories or articles, after which they had lapsed into long silence.

This discovery has led to the ruling that a proletarian writer, like his bourgeois counterpart, not only must write, but must write something good and, most serious test of all, must have his writings published. Membership in the union hereafter will be restricted to those who have published works of artistic or scientific importance.—Christian Science Monitor.

## Looked Miserable

A good job is spontaneous and will make the most staid smile. It is easier as no machine-made smile. A passenger on an Atlantic liner was getting up a yag-of-war, "Married versus Single," and got many more "Single" than "Married." Anxious to complete the dividend, he asked a melancholy individual standing apart by the rail of the ship and handed up to him.

"Are you married?" he asked.

"No—only seasick!" was the rejoinder.

The man who thinks he has a firm character has a wife who knows he is stubborn as a mule.

## Aviation In Canada

Advantages Gained By Fighting Plane Has Been Lost

Urging a renewed interest in aviation in this country, F. W. ("Casey") Baldwin, M.L.A. for Victoria county, delivered an interesting and instructive address at a capacity meeting under the auspices of Louisburg chapter, I.O.D.E.

Mr. Baldwin was the first British subject to fly a heavier-than-air machine, is a master of the subject of aerial development and navigation.

As Mr. Baldwin stated, it was British scientists and experimenters who laid the first firm foundation for heavier-than-air flight, but British official and public indifference to their work lost first flight honors to other nations.

While the quality of British aircraftmanship and skill stands pre-eminent, Old Country civil aviation still is laboring to regain the leadership lost through the neglect of those earlier years, said Mr. Baldwin. It is no longer a question of British official and public indifference to their work lost first flight honors to other nations.

Canada, whose fighting pilots gave the world the first practical heavy war days, lost most of that advantage by allowing an almost complete lapse of flying during the succeeding years so that while Canada still leads the world in some respects—notably in the opening up of new air routes and in the development of the aeroplane—the total extent of flying operations is very small, and has been still more seriously curtailed in recent years until now, with the exception of the few routes into the northland and a very few annual races, Canada is in a very poor position.

He urged a revival of public interest in the form of public demand for immediate expansion of Canadian flying.

## Many Entries Received

Thirteen Countries Are Competing In England-Australia Flight

More than 60 entries have been received by the Royal Aero Club for the England-Australia flight, which will start in October, expected to rank with the greatest, international contests in the history of aviation.

It is expected this competition will at least equal in interest and importance the famous Schneider cup trophy series, which ended in 1921, when British aviator Sir third consecutive victory and became the permanent holder of the trophy. For the England-Australia contest, the year Sir Macpherson Robertson of Melbourne, Australia, has given £75,000 and a gold cup to be awarded in 1925.

Thirteen countries are represented among the entries, including Great Britain, France, Italy, the United States, Holland, Denmark, Sweden, the Irish Free State, Germany, Portugal, India and New Zealand. Captain "Jim" Mollison of Australia, who has been named as the permanent holder of the trophy, is one of the entrants.

Approximately 20 of the entries already received are from British aviators. The United States has 15, though Holland and France especially among the other aircraft building nations have formidable entrants, the odds appear to favor a British or an American aircraft first crossing the finishing line in the speed race, which is the most sensational of the two events.

## Wanted To Learn How

Girl Calmly Watches Surgeons When They Remove Her Appendix

Her eyes were fixed on the surgeon, Evelyn McPherson, 15, of Memphis, Tenn., who wants to be a doctor, lay on an operating table and watched calmly as the surgeons removed her appendix a few days ago.

She told of asking for a local surgeon, and of how she arranged the mirrors in the operating room so she could see them work.

Brelyn plans to enter medical school when she finishes high school.

## Women Lawyers

The proposition of women lawyers to be named by calling to the bar is the same in average as in past years—one in 20. Among those called recently at the Middle Temple was Miss Mary Caroline Davies, daughter of D. J. Davies, chairman of the Newfoundland railway board.

Twenty thousand plants are contained in the cactus garden of the Huntington library in Los Angeles.

Some men are born small some are made small and others never find out how small they really are.

The Vatican at Rome contains about a thousand rooms and is the world's largest residence.

WORLD HAPPENINGS  
BRIEFLY TOLD

Getulio Vargas, provisional president of Brazil, was elected the first constitutional president of the second Brazilian republic.

Great Britain and the United States have decided to suspend bilateral conversations preliminary to the 1931 naval conference for the remainder of the summer.

World powers were committed to another serious fight at disarmament next September by the official convocation of the steering committee of the disarmament conference.

As result of improved business a firm of construction engineers at Burnley, England, is giving a week's holiday with full pay to 2,000 workers.

The Royal Academy of Music announced awards to two Canadians. The Alfred J. Whaley prize for violin went to Eugene F. Neufeld, Winnipeg, and the Acton-Bond prize in drama to Alice Lundquist, Victoria.

Turkey, through her ambassador, formally expressed her regret over killing of Surgeon-General J. W. Robinson and wounding of Lady T. A. K. Maumond of H.M.C. consular by Turkish sentries recently.

A stratosphere torpedo capable of taking off by an electric charge and travelling through the upper ether at enormous speed, directed by wireless to its target, has been invented by the young Japanese inventor, Osamu Chura. It was reported.

Miss P. M. Douglas, of Winnipeg, co-author of the satire "Britannia Waives the Ruler", returned to Canada recently on the liner Albatross. Miss Douglas, although she wrote the book about England some time ago, had never seen that country until the present trip.

Nineteen horses were recently shipped from Canada to George Ross, of Westminister, near Glasgow, Scotland, the department of agriculture announced. They were the first horses sent to the British Isles from the Dominion since the war. Nine were from Western Canada.

## Engineers Meet

Trend in Unmistakably Towards Better Things, Says Spence

In the field of engineering the trend is unmistakably toward better things. Harrison P. Eddy, Boston, president of the American Society of Civil Engineers, told that body and the Western professional gathering of the Engineering Institute of Canada when he addressed the opening session of the four-day convention of the two organizations at Vancouver. "It would be presumptuous for me to comment specifically upon trends of engineering in Canada," said Mr. Eddy, "but I would not be loyal to the Engineering Institute of Canada, of which I have the honor of being a member, if I did not give public recognition to the splendid work which it has done in upholding and advancing the profession."

He suggested more frequent and closer co-operation between the Engineering Institute of Canada and the American Society of Civil Engineers. Civil engineers from all parts of the continent attended the dual convention.

## Lives Sacrificed For Speed

Judge Delivers Terrible Indictment Of Motorists In Britain

"The roads of this country are strewn with the dead and dying," said a judge of the high court last week. He spoke adversely to the greater glory of the God of Speed 154 lives (the highest recorded toll), it would appear to be a record in the last recorded week, and 4,971 persons were injured. Within the last two months more than 10,000 motorists have been slaughtered, and the maimed approach forty times that number. In the face of such a record the Minister of Transport's lack of fostering a higher standard of conduct among road-users sounds a feeble irony. Why is he condemned for its bloodshed, and is made a warrant for every drastic measure. Here is a death-toll unequalled in any but the greatest of our modern wars, and no hurry seems to be felt about bringing it to an end—London Observer.

She—"Is that a popular song he is singing?"

He—"It was before he began singing it."

"Why does a red-headed girl always marry a quiet fellow?"

"She doesn't. He just gets that way."

W. N. U., 2025.

## Model For Mounties

Will Be Awarded On Completion Of Twenty Years' Service

Institution of a distinguished 20-year service medal for men of the Royal Canadian Mounted Police has been approved by King George V.

The medal will be awarded to officers, non-commissioned officers and constables of the force upon completion of 20 years' service.

Officially known as the Royal Canadian Mounted Police Long Service medal, the award will be circular in shape, in silver, one and one-half inches in diameter, with an effigy of King George on the obverse and the R.C.M.P. motto and crest on the reverse, surrounded by the legend: "For long service and good conduct."

## Where People Are Natural

New York Man Wants To Get Back To Tahiti

A Canadian Press letter says: To J. L. McLaughlin, painter-engineer-at-large, New York is a shanty city of shadows, its streets paved by people wearing masks, acting paranoiac, McLaughlin wants to get back from Tahiti, where he went to gather material for a book about the South Seas.

New he wants to get back in his 40-ton ketch to "where people are themselves." Says he of Tahiti: "There the people were to make. Even the whites after several months drop frowns and other facial affections and become natural—or unnatural, as you prefer."

## Agricultural Notes

Many Items Of Interest To The Western Farmer

No foreign wheat has been allowed to be imported into France for milling for domestic purposes since April 10, 1933.

Cornflower or Bachelor's button is one of the earliest hardy annuals to grow in Canada. Now where it has to flower, it will seed itself from year to year.

Artisan sleeping sickness in man and Twelve by disease of livestock are caused by a parasite of antelopes which causes no disease whatever in these animals.

From many of the feeding tests carried out at the Dominion Experimental Farms and elsewhere, it has been found that barley is a most excellent substitute for corn in the feeding of livestock.

The Academy of Sciences, London, reports that the injection of ethyl alcohol by hypodermic needle into immature tomato fruits still attached to the plant hastens ripening.

Created wheat grass is an excellent seed producer. The yields vary from 100 to 800 pounds according, depending chiefly on the supply of available moisture. The seed is easily harvested and threshed with ordinary farm equipment.

A live animal weighing 1,300 pounds, well finished, will yield a dressed carcass of 750 pounds. This, there are only 200 pounds of really prime beef. The prime beef is made up of the sirloin, porterhouse and tenderloin, and the prime ribs of the forequarter.

Canadian records show that by using two fans in refrigerator cars, one at each end in diagonally opposite corners, the temperature of fruit can be reduced a matter of 20 degrees in 8 or 10 hours, depending on the fruit to reach the consumer in good condition.

The Viking raspberry, originated at Vineland, Ontario, by the Dominion Experimental station from a cross between Cuthbert and Marlboro varieties, has been found highly promising in Michigan according to reports from the U.S. Department of Agriculture.

In a study at the Institute for Feeding Technique at Breslau, Germany, it was discovered that dried sugar beets could be used to make up large part of the ration for fattening green geese, if skim-milk and young clover or alfalfa were also given.

The provincial estimate of wool production in Australia for the season just closed (1931-1932), to 30 June, 1932, is 900,000,000 lbs. of wool, a decrease of 100,000,000 lbs. on the estimate for the 1932-33 season. Next season's production is likely to show a fairly substantial increase.

Shading with reinforced cheese cloth having a thread count of 22 by 22, and contents at Cornell University, has been found to be very effective in increasing the length of stem and size of flower of all varieties. Aster, chrysanthemum, snapdragons, gladioli, sweet peas and ranunculus were among the most benefited. Insect injury was decreased.

Of the 67 pedigrees swine registered during the month of June by the Canadian National Records and approved by the Dominion Minister of Agriculture, 531 were Yorkshire; 33 Berkshire; 45 Tamworth; 22 Chester White; 4 Poland China, and 1 Duroc Jersey. The registrations of pedigrees horses numbered 231, of which 102 were Percherons; 1,062 were Arabians. Other registrations were 410 shag; 28 foxes; 661 dogs; 1 poultry, and 11 goats (7 Toggenburg and 4 Saanen).

## Famous Geologist Dies

Heat Prostration Overcomes American Scientist

Rev. Stephen Richard, internationally known American geologist, died suddenly from heat prostration while investigating recent anthracite discoveries in Shantung.

A fellow of the American Geological Society, Richard, who had spent last year had headed the Department of Physics at the Catholic University of Belgium. He was a member of the Society of the Dnieper River.

Victims of the same heat wave were five Tibetan members of the expedition of the Frenchman, who were travelling to Peking, on special train.

The rhododendron while it has been found infested a few nurseries in the vicinity of Vancouver and Victoria, B.C. This constitutes the first record of such infestation in Canada. A bit smaller than the one preceding it.

## Dumb Animals Protected

England Has Draconic Law Governing Punishment For Cruelty

The New York Herald Tribune says: "Who receives the fatal third 'licks' in Germany not only is a thrice-cursed automobile thief, but also a criminal of the first rank."

Moose Jaw Girl is Empire's  
Swimming Queen

Mr. R. Scanlan was taken to the  
hospital on Saturday in a very  
weak condition.

Mr. and Mrs. Basil Moore and  
family left on Sunday to spend  
a short holiday at Elkwater.

Mr. and Mrs. Reiser have re-  
turned from a month's visit with  
Mrs. Reiser's sister in McCreary,  
Ontario.

Mrs. McLachlan and Mrs. Jno.  
McKen are leaving this week  
for Penitence for a short holiday  
with Mrs. McLachlan's daughter  
Mrs. Rand.

There will be an ice cream  
social at St. Ambrose Church  
lawn on Monday August 20th  
from 3 to 6 in the afternoon and  
from 7.30 in the evening.

Mr. and Mrs. Earl Fairbairn  
and children, of Calgary, arrived  
in town last Thursday and  
spent a few days with Mr.  
Fairbairn.

Mr. and Mrs. D. C. Cunningham  
and son, of Sovereign, Sask.,  
have been visiting Mrs.  
Cunningham's sister, Mrs. Floy,  
and Mr. Floyd returned to their  
home on Monday.

Mrs. Rutherford and Miss  
Margaret returned on Saturday  
from a trip to San Francisco  
where they visited Mrs. Rutherford's  
son, Walter. They were  
accompanied by Miss Ireland of  
Medicine Hat.

A lone bandit made a daring  
raid in Calgary last Monday.  
He held up a pedestrian and got  
\$9.95, then made the cashier at  
the Greyhound Bus office "stitch  
em up" and took \$177 from  
the till.

Among the Sunday visitors  
at Elkwater were Mr. and Mrs.  
C. H. Hodge, Miss Ruth Dew,  
Mr. H. G. Sheehy, Mr. and Mrs.  
F. Brown, and family, Mr.  
and Mrs. Geo. MacKay, Miss Mary  
the Palmer, Mr. and Mrs. Horne,  
Mr. and Mrs. Joe Podesta, Mr.  
and Mrs. W. Palmer, Mr. and  
Mrs. Barr and Mrs. Thomson.

MEDICINE HAT

Mr. Bill Paterson is holiday-  
ing at Banff.

Rev. H. S. Hannott is spend-  
ing a month's holiday at Elk-  
water Lake.

Mrs. Wheeler went to Elk-  
water Lake on Saturday to spend  
a few weeks' holiday.

Mr. W. King, who has been  
holidaying at the coast, returned  
home yesterday.

Mrs. Campbell, who has been  
the guest of Mrs. Fairbairn for  
the past few weeks, left today  
for her home in Brantford, Man.

Mr. and Mrs. A. R. Ballard and  
41 Mrs. Leamouth were visit-  
ing at Elkwater on Sunday.

Mrs. Ferguson and children,  
Bromehead, Sask., are here  
visiting the former's brother,  
Mr. Ward, and Mrs. Ward.

Mr. Deane, of Eston, Sask.,  
has been the guest of Mrs. Fair-  
bairn for the past few days.  
Mrs. Deane, who has been visit-  
ing here for the past few weeks,  
left with her husband for home  
today.

Knud Anderson, of Ranier,  
telling his parents for a few  
days before harvest starts when  
he is working. He reports a  
good crop in the irrigation dis-  
tricts. He returns to Ranier  
tomorrow.

Mrs. Fairbairn was the host-  
ess at a pleasant whist drive  
under the auspices of the Y. W.  
club, on Wednesday evening.  
Six tables were engaged in play.  
The honors going to Mrs. Wm.  
Camp. Mrs. Cahoon won the  
consolation.

Mrs. F. Cann had as her guest  
on Thursday, Mrs. A. H. Miller  
of Los Angeles. During the  
afternoon and evening several  
old friends called and a pleasant  
hour was spent, renewing old  
acquaintances. Although Mr.  
Miller has not been in Redcliff  
for ten years she says the place  
is greatly improved by tree  
planting and gardens.

**JUST FOR FUN**

Bulletin of a C. C. Camp—  
Stand a little closer to your razor  
when you shave.

An intelligent girl is one who  
knows how to refuse a kiss with-  
out being deprived of it.

To be the picture of health  
keep a good frame of mind.

You can't put things across by  
being cross.

If fan't your position that  
makes you happy or unhappy  
it's your disposition.

Don't put things off. Put  
them over.

The difference between stum-  
bling blocks and stepping stones  
is the way you use them.
